Glossary

Adjustments Budget – Prescribed in section 28 of the MFMA. The formal means by which a municipality may revise its annual budget during the year.

Allocations – Money received from provincial or national government or other municipalities.

AFS – Annual Financial Statements.

Budget – The financial plan of the Swellendam Municipality.

Budget Related Policy – Policy of a municipality affecting or affected by the budget, examples include tariff policy, rates policy and credit control and debt collection policy.

Capital Expenditure – Spending on assets such as land, buildings and machinery. Any capital expenditure must be reflected as an asset on the municipality's Statement of Financial Position.

Cash Flow Statement – A statement showing when actual cash will be received and spent by the municipality. Cash payments do not always coincide with budgeted expenditure timings. For example, when an invoice is received by the municipality it is shown as expenditure in the month it is received, even though it may not be paid in the same period.

CFO – Chief Financial Officer of the Swellendam Municipality.

DORA – Division of Revenue Act. Annual legislation that shows the total allocations made by national to provincial and local government.

Equitable Share – A general grant paid to municipalities. It is predominantly targeted to help with free basic services.

Fruitless and wasteful expenditure – Expenditure that was made in vain and would have been avoided had reasonable care been exercised.

GFS – Government Finance Statistics. An internationally recognised classification system that facilitates like for like comparison between municipalities.

GRAP – Generally Recognised Accounting Practice. The standard for municipal accounting and basis upon which the AFS are prepared.

IDP – Integrated Development Plan. The main strategic planning document of the municipality.

A handwritten signature in black ink, consisting of a stylized 'S' followed by a horizontal line.

KPI's – Key Performance Indicators. Measures of service output and/or outcome.

MBRR – Local government: Municipal Finance Management Act (No. 56 of 2003): Municipal budget and reporting regulations.

MFMA – The Municipal Finance Management Act (No. 56 of 2003). The principle piece of legislation relating to municipal financial management.

MTREF – Medium Term Revenue and Expenditure Framework. A medium term financial plan, usually 3 years, based on a fixed first year and indicative further two years budget allocations. Also includes details of the previous three years and current years' financial position.

NT – National Treasury

Net Assets – Net assets are the residual interest in the assets of the entity after deducting all of its liabilities. This means the net assets of the municipality equates to the "net wealth" of the municipality, after all assets were sold/recovered and all liabilities paid. Transactions which do not meet the definition of Revenue or Expenses, such as increases in values of Property, Plant and Equipment where there is no inflow or outflow of resources are accounted for in Net Assets.

Operating Expenditure – Spending on the day to day expenses of the municipality such as salaries and wages.

Rates – Local government tax based on the assessed value of a property. To determine the rates payable, the assessed ratable value is multiplied by the rate in rand.

R&M – Repairs and maintenance on Property, Plant and Equipment.

SCM – Supply Chain Management.

SDBIP – Service Delivery and Budget Implementation Plan. A detailed plan comprising quarterly performance targets and monthly budget estimates.

Strategic Objectives – The main priorities of the municipality as set out in the IDP. Budgeted spending must contribute towards the achievement of the strategic objectives.

Unauthorized expenditure – Generally, spending without, or in excess of, an approved budget.

Virement – A transfer of budget.

Virement Policy – The policy that sets out the rules for budget transfers.

A handwritten signature in black ink, consisting of stylized letters and a long horizontal stroke extending to the right.

Vote – One of the main segments into which a budget is divided. In Swellendam Municipality this means at directorate level. The votes for Swellendam therefore are:

- Municipal Manager;
- Corporate Services;
- Financial Services;
- Engineers Services; and
- Community Services

A handwritten signature in black ink, consisting of several loops and a long horizontal stroke.

Part 1 – Annual Budget

Section 1 – Mayor's Report

MY COMPREHENSIVE REPORT WILL BE INCLUDED IN THE FINAL BUDGET WHICH WILL BE TABLED AT THE END OF MAY 2018

For the interim I wish to give a summary of what my intent was with the compiling process of the 2018/19 budget and what we as council envisage to achieve with it. Broadly, the following principles were followed:

Once again we are reminded that given on-going economic pressures, the revenue side of the municipal budget will continue to be constrained, so we will need to make some very tough decisions on the expenditure side of the budget.

Priority still needs to be given to:

- Ensuring that drinking water and waste water management meets the required quality standards at all times;
- Protecting the poor;
- Ensuring that *public investments, services, regulations and incentives* are focussed in defined spatial areas (spatial targeting) to optimise overall connectivity and access to opportunities;
- Providing clear signals to private sector;
- Transport, human settlements, bulk infrastructure, economic infrastructure, land use management (e.g. zoning), tax and subsidy incentives;
- Supporting meaningful local economic development (LED) initiatives that foster micro and small business opportunities and job creation, especially through the jobs fund project;
- Securing the health of the asset base (especially the municipality's revenue generating assets) by increasing spending on repairs and maintenance;
- Expediting spending on capital projects that are funded by conditional grants; and
- Implementing cost containment measures.

Furthermore we must also ensure that the capital budget reflects consistent efforts to address the backlogs in basic services and the renewal of the infrastructure of existing network services.

A handwritten signature in black ink, located at the bottom right of the page.

Section 2 - Council Resolutions

The Annual Budget will be presented to council for final approval in terms of section 24 of the Municipal Finance Management Act (No. 56 of 2003) at the council meeting scheduled for May.

The annual budget for the financial year 2018/19 contains multi-year and single-year capital appropriations as set out in the following tables:

- Budgeted Financial Performance (revenue and expenditure by standard classification) as contained in Section 4 of the annual budget report Table A2;
- Budgeted Financial Performance (revenue and expenditure by municipal vote) as contained in Section 4 of the annual budget report Table A3;
- Budgeted Financial Performance (revenue by source and expenditure by type) as contained in Section 4 of the annual budget report Table A4; and
- Multi-year and single-year capital appropriations by municipal vote and standard classification and associated funding by source as contained in Section 4 of the annual budget report Table A5.

The annual budget as tabled for the financial year 2018/19 also contains the financial position, cash flow budget, cash-backed reserve/accumulated surplus, asset management and basic service delivery targets are approved as set out in the following tables:

- Budgeted Financial Position as contained in Section 4 of the annual budget report Table A6;
- Budgeted Cash Flows as contained in Section 4 of the annual budget report Table A7;
- Cash backed reserves and accumulated surplus reconciliation as contained in Section 4 of the annual budget report Table A8;
- Asset management as contained in Section 4 of the annual budget report Table A9; and
- Basic service delivery measurement as contained in Section 4 of the annual budget report Table A10.

The proposed tariffs, charges and fees for 2018/19 for property rates; electricity services; water services; sanitation services; solid waste services and other services charges are set out in Annexure A.

Budget related policies

The contents of the annual budget is set out in section 17 of the MFMA. In terms of section 17(3)(e) of the MFMA the budget proposals must also contain proposed amendments to the budget related policies.

The following budget related policies currently exist and have been circulated by email to all councillors, as it is too costly to circulate printed copies:

- Customer care and debt collection policy
- Asset Management, Infrastructure Investment, Funding and Reserve Policy
- Supply Chain Management Policy
- Budget Policy
- Banking Cash Management and Investment Policy
- Tariff Policy

A handwritten signature in black ink, consisting of a series of loops and a long horizontal stroke.

- Bad Debt Write-Off Policy
- Preferential Procurement Policy
- Petty Cash Policy
- Irregular Expenditure Policy
- Funding and Reserve Policy
- Borrowing Policy
- Indigent Policy
- Rates Policy
- Financial borrowing policy

A handwritten signature in black ink, consisting of a stylized, cursive script.

Section 3 - Executive Summary

The application of sound financial management principles for the compilation of the municipality's financial plan is essential and critical to ensure that the municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities.

National Treasury's MFMA Circular No. 89 and 91 were used to guide the compilation of the 2018/19 MTREF.

The following table is a consolidated overview of the proposed 2018/19 Medium-term Revenue and Expenditure Framework:

Table 1 Consolidated Overview

	Adjustment Budget 2017/18 R'000	Original budget 2018/19 R'000	% Change
Total Operating Revenue	240 134	255 735	6%
Total Operating Expenditure	242 400	264 396	9%
Surplus / (Deficit)	2 266	8 661	282%
Capital Expenditure	22 379	16 975	-24%

The total operating revenue has increased by 6% in the 2018/19 financial year when compared to the 2017/18 adjustment budget, but on the other hand operating expenditure has increased by 9% in the 2018/19 financial year.

Total operating expenditure for the 2018/19 financial year has been appropriated at R264.3 million, resulting in an operating budgeted deficit of R8.661 million.

However, when the non-cash entries are deducted, a cash surplus of R2.129 million is realizing. Therefor the budget is cash funded.

The capital budget of R16.975 million for 2018/19 is 24% lower when compared to the 2017/18 adjustment budget. The capital budget will be funded from Conditional Grants as well as the Capital Replacement Fund. The Capital Replacement Fund will contribute R5.5 million of the capital expenditure. There is very little scope to accommodate an increase in the existing borrowing levels over the medium-term and for this reason the capital program as reflected in the IDP and consequently requested by the officials in the annual budget input process was absolutely cut to a level which is realistic and affordable.

3.1 Operating Revenue Framework

For Swellendam to improve the quality of services to its citizens, it needs to generate the required revenue to fund the costs of delivering the services as anticipated. In these tough economic times strong revenue management is fundamental to the financial sustainability of this municipality. The reality is that we are faced with development backlogs and poverty. The expenditure required to

A handwritten signature in black ink, consisting of a stylized 'R' followed by a large, sweeping flourish.

address these challenges will inevitably always exceed available funding; hence difficult choices has to be made in relation to tariff increases and balancing expenditures, such as employee cost against realistically anticipated revenues.

The following table is a summary of the 2018/19 MTREF (classified by main revenue source):

Table 2 - Summary of revenue classified by main revenue source

WC034 Swellendam - Table A4 Budgeted Financial Performance (revenue and expenditure)

Revenue generated from rates and service charges forms a significant percentage of the revenue basket of the municipality. Rates and service charge revenues comprise 60,45% of the total revenue mix. The percentage revenue generated from rates and service charges in comparison with total revenue is largely due to the share that the sale of electricity contributes to the total revenue mix. This also clearly indicated that the municipality's revenue base is very dependent on the sale of electricity and thus any external decision impacts it, influencing the revenue in particular and the entire total budget. This electricity sensitivity is not healthy for the municipality and could have a severe impact if this important revenue resource is threatened by external factors and/or if it is to be withdrawn as a critical function from municipalities. The above table includes revenue foregone and tax rebates arising from discounts and rebates associated with the tariff policies of the municipality, as the revenue indicated reflects net figures.

Operating grants and transfers represent R49.878 million in the 2018/19 financial year. This amount and the amounts for the outer years are minimum guaranteed transfers from national government as gazette in the latest DORA. The aforementioned amount has a direct link to expenditure on operational grants and is only recognized as revenue when the conditions of the transfers made has been met. It might differ from the grants received.

The following table gives a breakdown of the various capital grants and subsidies allocated to the municipality over the medium term as proclaimed in the government gazette:

Table 3 Operating Transfers and Grant Receipts

Tariff-setting is a pivotal and strategic part of the compilation of any budget. When rates, tariffs and other charges were revised, local economic conditions, input costs and the affordability of services were taken into account to ensure the financial sustainability of the municipality.

National Treasury continues to encourage municipalities to keep increases in rates, tariffs and other charges as low as possible. Municipalities must justify in their budget documentation all increases in excess of the upper limit (ceiling) of the South African Reserve Bank's inflation target. Excessive increases are likely to be counterproductive, resulting in higher levels of non-payment.

It must also be appreciated that the consumer price index, as measured by CPI, is not a good measure of the cost increases of goods and services relevant to municipalities. The basket of goods and services utilized for the calculation of the CPI consist of items such as food, petrol and medical services, whereas the cost drivers of a municipality are informed by items such as the cost of remuneration, bulk purchases of electricity, petrol, diesel, chemicals, cement etc. For this reason the existing and prescribed inflation rate of $\pm 5.5\%$ is merely impossible to be instituted as benchmark in determining the anticipated cost increases. The current challenge the municipality is facing is to manage the gap between cost drivers and tariffs levied, as any shortfall must be made up by either operational efficiency gains or service level reductions.

Municipalities have to review the level and structure of their water and sanitation tariffs carefully with a view to ensure that water and sanitation tariffs are on aggregate fully cost-reflective – inclusive of bulk cost of water, the cost of maintenance and renewal of purification/treatment plants and network infrastructure and the cost of new infrastructure. Water and sanitation tariffs must also be structured to protect basic levels of service and water and sanitation tariffs are designed to encourage efficient and sustainable consumption (e.g. through inclining block tariffs).

However, during the past few years, council has approved water tariffs which have not realized sufficient funds to make a substantial profit. To rectify this problem it was decided that the 6 kiloliter of free water for residential properties, excluding indigent households, will be changed to R5 per kiloliter.

The proposed tariff increases are set at:

- Property rates - 9.5 % (No fixed percentage increase, due to the implementation of the general valuation roll. The 9.5% indicates total income increase, with a decrease in the tariff of 19%.)
- Electricity - 6% (to be determined by NERSA)
- Water (units) - 20% (depending on usage)
- Refuse Removal - 8%
- Sewerage - 7%

Overall impact of tariff increases on households

The following table shows the overall expected impact of the tariff increases on income range middle and affordable households, as well as on indigent households receiving free basic services.

Table 5- Household bills

From the above tables it is evident that the total average increase in the monthly accounts will be:

1. Middle income range 3.8% per month
2. Affordable range 2.1% per month
3. Indigent range 6.0% per month

Income forgone (Free Basic Services and other rebates)

The social package assists households that are poor or face other circumstances that limit their ability to pay for services. Rebates and exemptions in terms of section 15 of the Municipal Property Rates Act (No. 6 of 2004) are applicable to those who qualify for it in terms of the act.

Currently all residential households received 20kWh electricity as free basic services. In 2018/19 only residential households qualified as indigents will receive 6kl water and 50kWh electricity as free basis services.

To receive these rebates and free services the households are required to register in terms of the Municipality's Indigent Policy.

At present there are 1 594 indigent households and 153 poor households which are entitled to rebates and subsidies as defined and set out in the Councils Credit Control Policy.

The total cost of the social package in respect of the income forgone on free services is largely financed by national government through the local government equitable share received in terms of the annual Division of Revenue Act. The rebates on the tax are largely discounted as a direct cost.

3.2 Operating Expenditure Framework

The following table is a high level summary of the 2018/19 budget and MTREF (classified per main type of operating expenditure):

Table 6 - Summary of operating expenditure by standard classification item

WC034 Swellendam - Table A4 Budgeted Financial Performance (revenue and expenditure)

Loss on disposal of PPE		-	31	2	-	-	-	-	-	-	-
Total Expenditure		212 691	226 153	216 005	232 430	232 430	232 430	232 430	254 395	264 935	272 055

The budgeted allocation for employee related costs for the 2018/19 financial year totals to R97.794 million, which represents 36,98% of the total expenditure budget. Salary increases have been factored into this budget at a percentage increase of 7,5% for the 2018/19 financial year, due to the fact that the salary and wage negotiations are still in progress. The implementation of TASK had a substantial influence on the employee related costs.

The cost associated with the remuneration of councillors is determined by the Minister of Co-operative Governance and Traditional Affairs in accordance with the Remuneration of Public Office Bearers Act, 1998 (No. 20 of 1998). The most recent proclamation in this regard has been taken into account in compiling the municipality's budget.

The provision for debt impairment was determined based on an annual collection rate of 98%. The previous financial year the collection rate was over 100% and currently for this financial year it is 101%.

Provision for depreciation and asset impairment has been informed by the asset register and proposed capital budget. Depreciation is widely considered a proxy for the measurement of the rate of asset consumption. Budget appropriations in this regard total to R10.825 million for the 2018/19 financial year and represent 4.09% of the total operating expenditure.

Finance charges consist primarily of the repayment of interest on long-term borrowing (cost of capital). Finance charges - representing 2.04% (R5.39 million) of operating expenditure, excluding annual redemption for 2018/19.

Bulk purchases are directly influenced by the purchase of electricity from Eskom. The annual price increases have been factored into the budget appropriations and directly impacting the revenue provisions. The expenditure includes distribution losses. Bulk purchases represent 21.68% (R57.319 million) of operating expenditure for the 2018/19 financial year.

Other materials represent 7.91% (R20.917 million) of operating expenditure for the 2018/19 financial year.

Contracted services represent 7.21% (R19.075 million) of operating expenditure for the 2018/19 financial year.

Transfers and subsidies represent 0.89% (R2.372 million) of operating expenditure for the 2018/19 financial year.

Other expenditure comprises of various line items relating to the daily operations of the municipality; as example the operational expenditure on grants and subsidies, repairs and maintenance and other services. Growth on line items other than those linked to grant expenditure has been limited. Further details relating to other expenditure can be seen in Table SA1.

Repairs and maintenance

In terms of the Municipal Budget and Reporting Regulations, operational repairs and maintenance are not considered a direct expenditure driver, but rather an outcome of certain other expenditures, such as remuneration, purchases of materials and contracted services. At current the municipality cannot report on the outcome of the different cost drivers combined to repairs

and maintenance. The table below provides a breakdown of the repairs and maintenance in relation to asset class and reflects only purchases of materials and some contracted services.

A handwritten signature in black ink, consisting of several loops and a long tail stroke, positioned below the official stamp.

Explanatory notes to Table A1 - Budget Summary

1. Table A1 is a budget summary and provides a concise overview of the municipality's budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow and MFMA funding compliance).
2. The table provides an overview of the amounts for operating performance, resources deployed to capital expenditure, financial position, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.
3. Financial management reforms emphasize the importance of how the municipal budget is being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget.

The Budget Summary provides the key information in this regard:

- a. The operating surplus/deficit (after Total Expenditure) is supposed to be positive over the MTREF.
- b. Capital expenditure is balanced by capital funding sources, of which:
 - i. Transfers recognised is reflected on the Financial Performance Budget;
 - ii. Borrowing is incorporated in the net cash from financing in the Cash Flow Budget;
 - iii. Internally generated funds are supposed to be financed from a combination of the current operating surplus and accumulated cash-backed surpluses from previous years. The municipality's cash flow should remain positive. The cash flow is indicating that there are limited cash resources available to fund the Capital Budget and that the municipality is dependent on borrowing and Government Grants and Subsidies to finance future capital needs; and
 - iv. This scenario will remain a reality unless council embarked on a process on building cash reserves which will have a direct impact on future tariffs and taxes to be levied.

A handwritten signature in black ink, consisting of a series of loops and a long horizontal stroke extending to the right.

Explanatory notes to Table A2 - Budgeted Financial Performance (revenue and expenditure by standard classification)

1. Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 15 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms of each of these functional areas which enables the National Treasury to compile 'whole of government' reports.
2. Note the Total Revenue on this table includes capital revenue (Transfers recognized – capital) and therefore does not balance to the operating revenue shown on Table A4.
3. Note that as a general principle the revenues for the trading services should exceed their expenditures.
4. Other functions that show a deficit between revenue and expenditure are being financed from rates revenues and other revenue sources reflected under executive and council as well as finance and administration.

A stylized, handwritten signature in black ink, consisting of several loops and a long horizontal stroke at the end.

Explanatory notes to Table A3 - Budgeted Financial Performance (revenue and expenditure by vote)

1. Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organisational structure of the municipality. This means it is possible to present the operating surplus or deficit of a vote.
2. This is the level at which council will approve the budget in terms of Section 24(2)(c)(iii) of the MFMA.

A large, stylized handwritten signature in black ink, located at the bottom right of the page.

Explanatory notes to Table A4 - Budgeted Financial Performance (revenue and expenditure)

1. Total revenue amounts to R244.244 million for 2018/19.
2. Revenue to be generated from property rates is R36.511 million in the 2018/19 financial year which represents 14.94% of the operating revenue base of the municipality and therefore remains a significant funding source for the municipality.
3. Service charges relating to electricity, water, sanitation and refuse removal constitutes the largest component of the revenue basket of the municipality totaling to R118.083 million for the 2018/19 financial year and reflecting 48.34% of the total revenue base.
4. Fines, penalties and forfeits also significantly contributes to the revenue basket totaling to R28.052 million for the 2018/19 financial year and reflecting 11.48% of the total revenue base.
5. Transfers of operating grants recognised, includes the local government equitable share and other operating grants received from national and provincial government. This revenue only realising after preset conditions were met. It needs to be noted that the transfers recognised fluctuates due to the nature of expenses in the provincial housing grant.
6. More detail regarding the employee related cost and the remuneration of councillors are provided in Section 11 of this report.
7. More emphasis will be placed on the debt impairment; depreciation charges and the finance charges in Section 10 – Budget Funding.
8. Employee related costs and bulk purchases are the main cost drivers within the municipality and alternative operational efficiencies will have to be identified and instituted to reduce the impact of wage and bulk tariff increases in future years.

A handwritten signature in black ink, consisting of a stylized 'R' with a large loop and a horizontal stroke extending to the right.

Explanatory notes to Table A5 - Budgeted Capital Expenditure by vote, standard classification and funding source

1. Table A5 is a breakdown of the capital program in relation to capital expenditure by municipal vote (multi-year and single-year appropriations), capital expenditure by standard classification and the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.
2. The MFMA provides that a municipality may approve multi-year or single-year capital budget appropriations.
3. Unlike multi-year capital appropriations which normally would result in work-in-progress at the end of a financial year, single-year appropriations relate to expenditure that will incur in the specific budget year such as the procurement of vehicles and specialised tools and equipment. The budget appropriations for the two outer years are indicative allocations based on the inputs of departments and will be reviewed on an annual basis to assess the relevance of the expenditure in relation to the strategic objectives and service delivery imperatives of the municipality. For the purpose of funding assessment of the MTREF, these appropriations have been included, but no commitments will be incurred against single-year appropriations for the two outer-years.
4. The capital program is funded from own funding and government grants and transfers. As mentioned previously the funding source of new borrowings is a remaining problem and the municipality is dependent on the bank sector and the risk assessment process to raise future loans.
5. For 2018/19 capital transfers from national and provincial government amounts to R11.491 million.

A handwritten signature in black ink, consisting of a large, stylized 'R' followed by a horizontal line.

Explanatory notes to Table A6 - Budgeted Financial Position

1. Table A6 is consistent with international standards of General Recognized Accounting Practices (GRAP) and assists councillors and management to understand the impact of the budget on the statement of financial position.
2. This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international standard which presents assets less liabilities as the accounted Community Wealth. The order of items within each group, illustrates its liquidity; i.e. assets readily converted to cash or liabilities immediately required to be transformed in cash.
3. Table A6 is supported by an extensive table of notes (Table SA3) providing a detailed analysis of the major components of a number of items, including:
 - Call investments deposits;
 - Consumer debtors;
 - Property, plant and equipment;
 - Trade and other payables;
 - Provisions non-current;
 - Changes in net assets; and
 - Reserves
4. The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community.
5. Any movement on the budgeted financial performance or the capital budget will inevitably impact on the budgeted financial position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition, the funding compliance assessment is informed directly by forecasting the statement of financial position.

A handwritten signature in black ink, consisting of a large, stylized 'R' followed by a horizontal line.

Table A7 - Budgeted Cash Flow Statement

Explanatory notes to Table A7 - Budgeted Cash Flow Statement

1. The budgeted cash flow statement is the first measurement in determining if the budget is funded. It shows the expected level of cash in-flows versus cash out-flows that is likely to result from the implementation of the budget. The net effect of budget (both capital & operational) is represented in the net increase or decrease in cash and cash equivalents.
2. Table A7 is supported by an extensive table (Table SA30) that provides a breakdown per month as well as providing a detailed analysis of the major sources of receipts and expenditure.

A handwritten signature in black ink, appearing to be a stylized 'R' or similar character, located at the bottom right of the page.

Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

WC034 Swellendam - Table A8 Cash backed reserves/accumulated surplus reconciliation

Explanatory notes to Table A8 - Cash Backed Reserves/Accumulated Surplus Reconciliation

1. The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of the MFMA circular 42 – Funding a Municipal Budget.
2. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist.
3. The outcome of this exercise would either be a surplus or a deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be "funded".

A handwritten signature in black ink, consisting of a large, stylized loop followed by a horizontal stroke.

Explanatory notes to Table A9 - Asset Management

1. Table A9 provides an overview of municipal capital allocations to building new assets and the renewal of existing assets, as well as spending on repairs and maintenance by asset class.
2. National Treasury has recommended that municipalities should allocate at least 40% of their capital budget to the renewal of existing assets and allocations to repairs and maintenance should be 8% of PPE. The municipality does not meet both of these recommendations, because as mentioned above the annual budget input process was absolutely cut to a level which is realistic and affordable, due to financial constraints.
3. The table above provides an analysis between depreciation and operational repairs and maintenance over the MTREF and highlights the fact that the municipality's capital budget is excessive and will not address the maintenance backlog.

A handwritten signature in black ink, consisting of several loops and a long horizontal stroke at the end.

Explanatory notes to Table A10 - Basic Service Delivery Measurement

- Table A10 provides an overview of service delivery levels, including backlogs (below minimum service level), for each of the main services.

A large, stylized handwritten signature in black ink, located at the bottom right of the page.

Part 2 – Supporting Documentation

Section 5 - Overview of the annual budget process

Section 53 of the MFMA requires the mayor of the municipality to provide general political guidance in the budget process and the setting of priorities that must guide the preparation of the budget. In addition, Chapter 2 of the Municipal Budget and Reporting Regulations states that the mayor of the municipality must establish a Budget Steering Committee to provide technical assistance to the mayor in discharging the responsibilities set out in section 53 of the MFMA.

The Budget Steering Committee consists of the finance portfolio committee members.

The primary aim of the Budget Steering Committee is to ensure:

- that the process followed to compile the budget complies with legislation and good budget practices;
- that there are proper alignment between the policy and service delivery priorities set out in the municipality's IDP and the budget, taking into account the need to protect the financial sustainability of the municipality;
- that the municipality's revenue and tariff setting strategies ensure that the cash resources needed to deliver services are available; and
- that the various spending priorities of the different municipal departments are properly evaluated and prioritised in the allocation of resources.

5.1 Budget Process Overview

In terms of section 21 of the MFMA the mayor is required to table in council ten months before the start of the new financial year a time schedule that sets out the process to revise the IDP and prepare the budget.

The mayor tabled the required timetable end of August 2017.

5.2 Financial Modeling and Key Planning Drivers

The following key factors and planning strategies have informed the compilation of the 2018/19 MTREF:

- Municipality's growth
- Policy priorities and strategic objectives
- Asset maintenance
- Economic climate and trends (i.e. inflation, Eskom increases, household debt, migration patterns)
- Performance trends
- Debtor payment levels
- The need for tariff increases versus the ability of the community to pay for services
- Improved and sustainable service delivery

A handwritten signature in black ink, consisting of stylized, overlapping loops and strokes.

In addition to the above, the strategic guidance given in National Treasury's MFMA Circular 91 has been taken into consideration in the planning and prioritisation process.

Section 6 - Overview of alignment of annual budget with IDP

The Constitution mandates local government with the responsibility to exercise local developmental and cooperative governance. The eradication of imbalances in South African society can only be realised through a credible integrated developmental planning process.

Municipalities in South Africa need to utilise integrated development planning as a method to plan future development in their areas and so find the best solutions to achieve sound long-term development goals. A municipal IDP provides a five year strategic program of action aimed at setting short, medium and long term strategic and budget priorities to create a development platform, which correlates with the term of office of the political incumbents. The plan aligns the resources and the capacity of a municipality to its overall development aims and guides the municipal budget. An IDP is therefore a key instrument which municipalities use to provide vision, leadership and direction to all those that have a role to play in the development of a municipal area. The IDP enables municipalities to make the best use of scarce resources and speed up service delivery.

Integrated developmental planning in the South African context is amongst others, an approach to planning aimed at involving the municipality and the community to jointly find the best solutions towards sustainable development. Furthermore, integrated development planning provides a strategic environment for managing and guiding all planning, development and decision making in the municipality.

It is important that the IDP developed by municipalities correlate with national and provincial intent. It must aim to co-ordinate the work of local and other spheres of government in a coherent plan to improve the quality of life for all the people living in that area.

The aim of this revision cycle was to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area, also reflecting issues of national and provincial importance. One of the key objectives is therefore to ensure that there exists alignment between national and provincial priorities, policies and strategies and the municipality's response to these requirements.

The national and provincial priorities, policies and strategies of importance include amongst others:

- Green Paper on National Strategic Planning of 2009;
- Government Programme of Action;
- Development Facilitation Act of 1995;
- Provincial Growth and Development Strategy (GGDS);
- National and Provincial spatial development perspectives;
- Relevant sector plans such as transportation, legislation and policy;
- National Key Performance Indicators (NKPis);
- Accelerated and Shared Growth Initiative (ASGI);
- National 2014 Vision;
- National Spatial Development Perspective (NSDP) and
- The National Priority Outcomes.

The Constitution requires local government to relate its management, budgeting and planning functions to its objectives. This gives a clear indication of the intended purposes of municipal integrated development planning. Legislation stipulates clearly that a municipality must not only give effect to its IDP, but must also conduct its affairs in a manner which is consistent with its IDP.

In order to ensure integrated and focused service delivery between all spheres of government it was important for the municipality to align its budget priorities with that of national and provincial government. All spheres of government place a high priority on infrastructure development, economic development and job creation, efficient service delivery, poverty alleviation and building sound institutional arrangements.

Local priorities were identified as part of the IDP review process which is directly aligned to that of the national and provincial priorities.

In line with the MSA, the IDP constitutes a single, inclusive strategic plan for the municipality. The five-year program responds to the development challenges and opportunities faced by the municipality by identifying the key performance areas to achieve the strategic objectives.

The 2018/19 MTREF has therefore been directly informed by the IDP revision process and the following tables provide a reconciliation between the IDP strategic objectives and operating revenue, operating expenditure and capital expenditure.

Section 7 - Measurable performance objectives and indicators

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities. In accordance with legislative requirements and good business practices as informed by the National Framework for Managing Programme Performance Information, the municipality has developed and implemented a performance management system of which the system is constantly refined as the integrated planning process unfolds. The municipality targets, monitors, assess and reviews organisational performance which in turn is directly linked to individual employee's performance.

At any given time within government, information from multiple years is being considered, plans and budgets for next year, implementation for the current year and reporting on last year's performance. Although performance information is reported publicly during the last stage, the performance information process begins when policies are being developed and continues through each of the planning, budgeting, implementation and reporting stages. The planning, budgeting, implementation and reporting cycle can be graphically illustrated as follows:

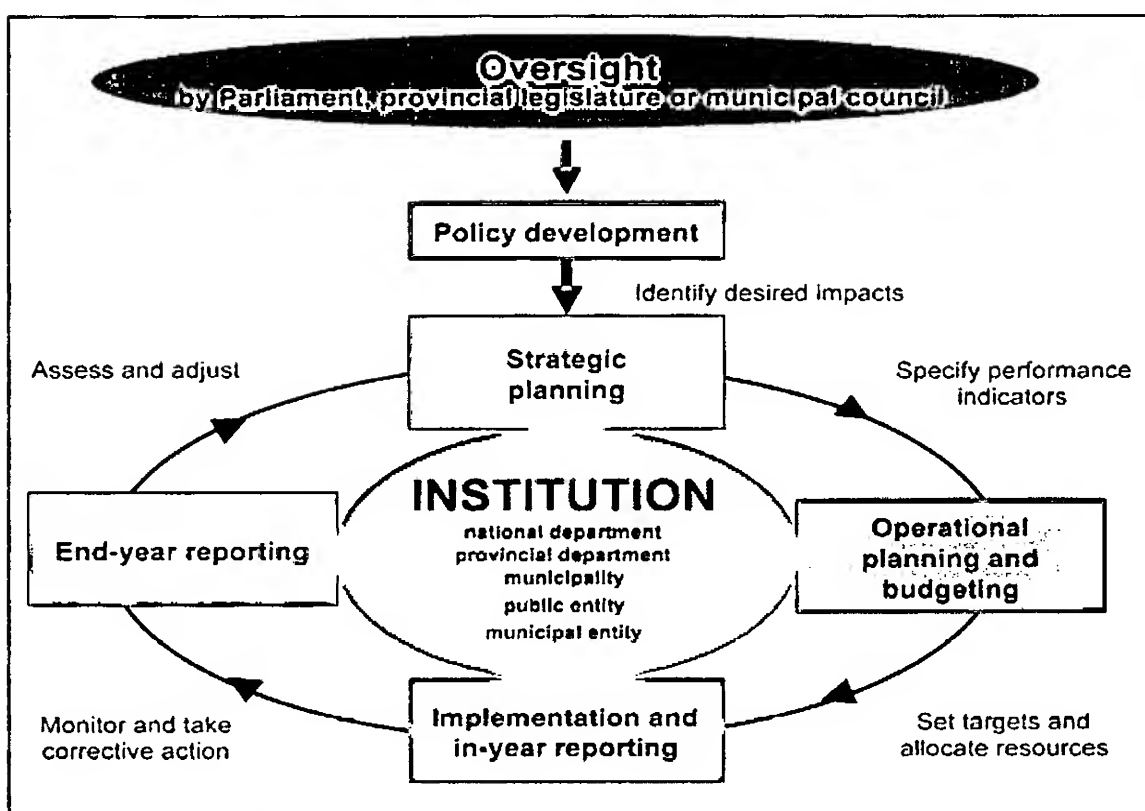

Figure 3 - Planning, budgeting, implementation and reporting cycle

The performance of the municipality relates directly to the extent to which it has achieved success in realising its goals and objectives, complied with legislative requirements and meeting stakeholder expectations. The municipality therefore has adopted one integrated performance management system which encompasses:

- Planning (setting goals, objectives, targets and benchmarks);
- Monitoring (regular monitoring and checking on the progress against plan);
- Measurement (indicators of success);
- Review (identifying areas requiring change and improvement);
- Reporting (what information, to whom, from whom, how often and for what purpose); and
- Improvement (making changes where necessary).

A handwritten signature in black ink, consisting of a series of loops and a long horizontal stroke extending to the right.

The performance information concepts used by the municipality in its integrated performance management system are aligned to the *Framework of Managing Programme Performance Information* issued by National Treasury:

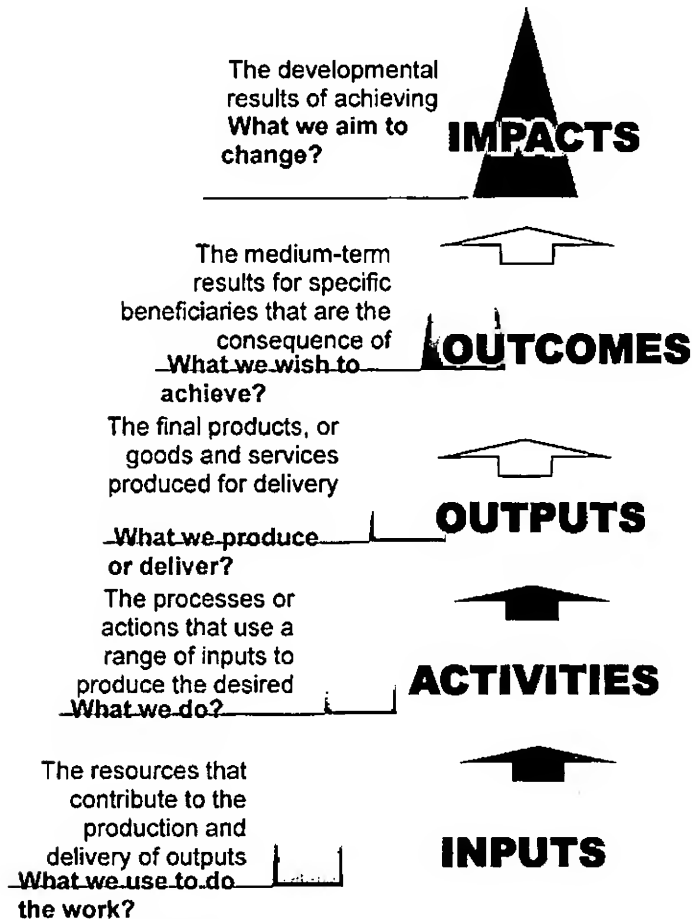

Figure 4 - Definition of performance information concepts

A large, stylized handwritten signature in black ink, located at the bottom right of the page.

The following table sets out the municipality's main performance objectives and benchmarks for the 2018/19 MTREF.

7.1 Performance indicators and benchmarks

7.1.1 Borrowing Management

Capital expenditure in local government can be funded by capital grants, own-source revenue and long term borrowing. The ability of a municipality to raise long term borrowing is largely dependent on its creditworthiness and financial position. The borrowing strategy must be primarily informed by the affordability of debt repayments. The structure of the municipality's debt portfolio is dominated by annuity loans. The following financial performance indicators have formed part of the compilation of the 2018/19 MTREF:

- *Capital charges to operating expenditure* are a measure of the cost of borrowing in relation to the operating expenditure. It can be seen that the cost of borrowing has been stable, while borrowing is considered a prudent financial instrument in financing capital infrastructure development, this indicator indicates that the capital program from new borrowings is realistic.
- *Borrowing funding of own capital expenditure* measures the degree to which own capital expenditure (excluding grants and contributions) has been funded by way of borrowings.

In summary, various financial risks could have a negative impact on the future borrowing capacity of the municipality. In particular, the continued ability of the municipality to meet its revenue targets and ensure its forecasted cash flow targets, but more so unrealistic capital programs from new borrowings.

7.1.2 Safety of Capital

The *gearing ratio* is a measure of the total long term borrowings over funds and reserves. The ratio peaked at 1.74. As part of the planning guidelines it implicates that the municipality must ensure proper cash-backing of reserves and funds as a prudent financial sustainability objective and limited new borrowings.

7.1.3 Liquidity

Current ratio is a measure of the current assets divided by the current liabilities. The ratio is 1.22 in the 2018/19 financial year.

The *liquidity ratio* is a measure of the ability of the municipality to utilise cash and cash equivalents to extinguish or retire its current liabilities immediately. Ideally the municipality should have the equivalent cash and cash equivalents on hand to meet at least the current liabilities, which should translate into a liquidity ratio of 1. Anything below 1 indicates a shortage in cash to meet creditor obligations. The ratio is 0.6 in the 2018/19 financial year.

A handwritten signature in black ink, consisting of a large, stylized 'R' followed by a horizontal line.

7.1.4 Revenue Management

In order to reach the targets and maintains the level of outstanding debtors to revenue, an aggressive revenue management framework must be implemented, not only from current billings but also from debtors that are in arrears in excess of 90 days. The intention of this strategy should be to ensure accurate billing, customer service, credit control and debt collection.

7.1.5 Creditors Management

For the municipality to ensure that creditors are settled within the legislated 30 days from date the invoice/statement poses to be a challenge. While the liquidity ratio is of concern, by applying daily cash flow management the municipality has managed to ensure an almost 100% compliance rate to this legislative obligation.

7.1.6 Other Indicators

Both *water and electricity distribution losses* are material. Initiatives to ensure that targets are achieved include managing illegal connections and theft of electricity, including prepaid meters.

A handwritten signature in black ink, consisting of several loops and a long horizontal stroke at the end.

Section 8 - Overview of budget related-policies

The municipality's budgeting process is guided and governed by relevant legislation, frameworks, strategies and related policies.

The following policies have been reviewed:

- Customer care and debt collection policy
- Asset Management, Infrastructure Investment, Funding and Reserve Policy
- Supply Chain Management Policy
- Budget Policy
- Banking Cash Management and Investment Policy
- Tariff Policy
- Bad Debt Write-Off Policy
- Preferential Procurement Policy
- Petty Cash Policy
- Irregular Expenditure Policy
- Funding and Reserve Policy
- Borrowing Policy
- Indigent Policy
- Rates Policy
- Financial borrowing policy

Section 9 - Overview of budget assumptions

9.1 External factors

Swellendam's income base comprise of mostly residential consumers and rate payers of which a material percentage are retired people with a fixed monthly income.

Eskom price increases are an external factor that council has no control over.

9.2 General inflation outlook and its impact on the municipal activities

There are five key factors that have been taken into consideration in the compilation of the 2018/19 MTREF:

- National government macro-economic targets;
- The general inflationary outlook and the impact on municipality's residents and businesses;
- The impact of municipal cost drivers;
- The increase in prices for bulk electricity; and
- The increase in the cost of remuneration.

Employee related costs comprise 36.98% of total operating expenditure in the forecast for the 2018/19 financial year and therefore these increases (which include salary increases and evaluation of posts) places a disproportionate upward pressure on the expenditure budget.

9.3 Interest rates for borrowing and investment of funds

The MFMA specifies that borrowing can only be utilised to fund capital or refinancing of borrowing under certain conditions. The 2018/19 MTREF is based on the assumption that no borrowings will be utilised.

9.4 Collection rate for revenue services

The base assumption is that tariff and rating increases will increase at a rate slightly higher than CPI over the long term. It is also assumed that current economic conditions and relatively controlled inflationary conditions will continue for the forecasted term.

The rate of revenue collection is currently expressed as 101% of annual amounts billed.

9.5 Salary increases

Refer to paragraph 9.2

A large, stylized handwritten signature in black ink, located at the bottom right of the page.

Section 10 - Overview of budget funding

10.1 Medium-term outlook: operating revenue

Tariff setting plays a major role in ensuring desired levels of revenue. Correct and accurate tariffs are imperative in the compilation of a credible and funded budget. The municipality derives most of its operational revenue from the delivery of goods and services such as water, electricity, sanitation and solid waste removal. Apart from the services, other revenue i.e., operating grants, building plan fees, licenses and permits, fines etc. are applicable. The rates and taxes will then be the shortfall in revenue, after all the revenue resources have been determined and will reflect the balancing number.

The proposed tariff increases for the 2018/19 MTREF on the different revenue categories are as follows:

- Property rates - 9.5 % (No fixed percentage increase, due to the implementation of the general valuation roll. The 9.5% indicates total income increase, with a decrease in the tariff of 19%.)
- Electricity - 6% (to be determined by NERSA)
- Water (units) - 20% (depending on usage)
- Refuse Removal - 8%
- Sewerage - 7%

The tables below provide detail investment information and investment particulars by maturity.

A large, stylized handwritten signature in black ink, located at the bottom right of the page.

Section 13 - Contracts having future budgetary implications

In terms of the municipality's Supply Chain Management Policy, no contracts are awarded beyond the medium-term revenue and expenditure framework (three years). In ensuring adherence to this contractual time frame limitation, all reports submitted to either the Bid Evaluation and Adjudication Committees must obtain formal financial comments from the Financial Management Division of the Treasury Department.

A handwritten signature in black ink, consisting of several loops and a long horizontal stroke extending to the right.

Section 14 - Capital expenditure details

The following tables present details of the municipality's capital expenditure program.

A handwritten signature in black ink, consisting of a large, stylized initial 'R' followed by a long horizontal stroke.

A large, stylized handwritten signature in black ink, located at the bottom right of the page.

SA32 – List of external mechanisms

The municipality has none, therefore the table is not included.

A handwritten signature in black ink, consisting of a large, stylized 'S' followed by a series of loops and a final horizontal stroke.

Section 16 – Legislation compliance status

Compliance with the MFMA implementation requirements have been substantially adhered to through the following activities:

1. In-year reporting

Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the executive mayor (within 10 working days) has progressively improved and includes monthly published financial performance on the municipality's website.

2. Internship program

The municipality is participating in the Municipal Financial Management Internship program and has employed four interns undergoing training in various divisions of the Financial Services Department.

3. Budget and Treasury Office

The Budget and Treasury Office has been established in accordance with the MFMA.

4. Audit Committee

An Audit Committee has been established and is fully functional.

5. Service Delivery and Implementation Plan

The detail SDBIP document is in a draft stage and will be finalized after the approval of the 2018/19 MTREF in May 2018 and will be directly aligned and informed by the 2018/19 MTREF.

6. Annual Report

The Annual report is compiled in terms of the MFMA and National Treasury requirements.

7. MMC Training

The University of Stellenbosch has proposed a new schedule of dates for the full MMC – program in 2018 to give those who are busy an opportunity to complete. Nearly all financial employees finished their MMC training program.

8. Policies

A handwritten signature in black ink, consisting of several loops and a long horizontal stroke at the end.

Revised policies in terms of the Municipal Budget and Reporting Regulations are tabled with the 2018/19 MTREF.

Section 17 - Municipal manager's quality certificate

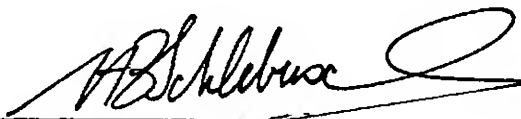

I, H.B. Schlebusch, acting Municipal Manager of Swellendam Municipality, hereby certify that the annual budget and supporting documentation have been prepared in accordance with the Municipal Finance Management Act and the regulations made under the Act and that the annual budget and supporting documents are consistent with the Integrated Development Plan of the municipality.
